

Rafael Manuel da Costa Baptista

Languages

Dutch • Portuguese • English

I was born in the Netherlands and lived there for 15 years when I came to Portugal, I learned the Portuguese language when I came to Portugal on vacation so I did already know something before I studied there.

The English language I learned in the Netherlands school and since I've always had an affection for learning about new things, ideas, concepts, like programming computers and fixing electronic devices and almost everything has an English manual, that's why I've learned writing and reading the language very fast.

Work experience

Julho, 2020 – Agosto, 2020

July, 2021 – November, 2021

Cyberprotech

Hardware, Networks, Ethical Hacker

- Configure routers and switches
- Website pentesting
- Create Python and C programs
- Creation of virtual machines
- Udemy Formations
- Monitor and detect cybersecurity incidents
- Recover data after a cybersecurity incident

May, 2015 – July, 2015

Laser Print

Designer

- Photo editing in Photoshop
- Creation of flyers and banners on illustrator.

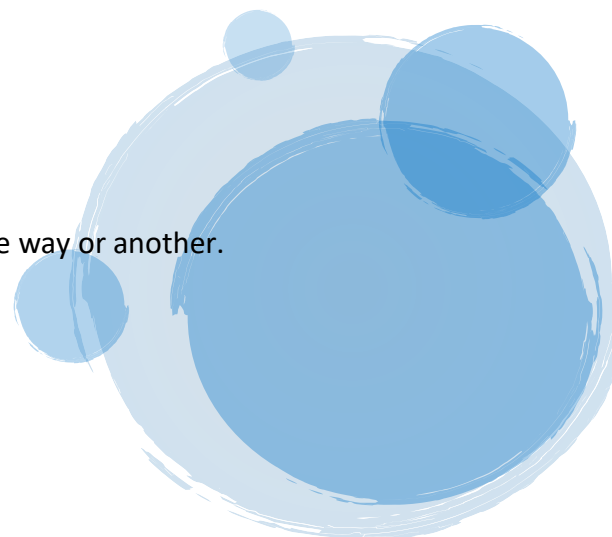

Programming

Back in the days when I was playing GTA SA-MP the servers used PAWN which is a C-based language so like anyone else that wanted to have their own server I started learning how to program.

I also know how to use the following languages:

- Python
- C / C++
- Java
- Javascript
- HTML

I don't know everything but I can always get to the objective in one way or another.

Communication

Good communication skills acquired as "responsible for sales" and as advisor of trainees, as well as in solving problems with foreign and national suppliers.

Leadership

At Sevenbits I had the opportunity to guide interns for integration into the company. Through full supervision of the company in the absence of the boss and distribution of work tasks, I was able to consolidate leadership skills.

Multiskilled

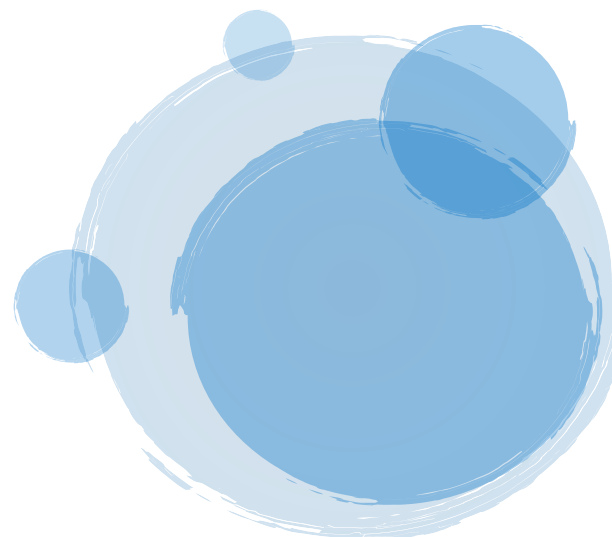

I work both individually and as a team, in different environments and areas, from doing digital work to contacting the public, sales or customer support.

Responsible and Punctual

All jobs were always performed with commitment, being known for being punctual, compliant and very responsible. I believe that stimulation in the workplace increases productivity and efficiency.

Hobby

- I like to listen to music even when working;
- Research information on new technologies that have just been released, for my professional and personal development;
- Play games on the computer;
- Play with servers and reconfigure that;
- Watch movies to relax;
- See videos of how equipment works;
- Create plans/schematics for implementing equipment you would like to have one day;
- Cooking for family and/or friends.

Certificados Udemy

- Everything About Kali Linux OS;
- Fundamentals of IoT (Internet of Things);
- Information Gathering - Phase 1 of Cyber Security;
- Applied Ethical Hacking and Rules of Engagement;
- IP Addressing and Subnetting - Zero to Hero;
- Game hacking – Cheat engine: Basics
- Linux Command Line Terminal Basic for Beginners;
- How to Install a Free SSL Certificate using Let's Encrypt;
- International Computer Driving License (ICDL);
- LTE Fourth Generation Mobile System;
- The OWASP top 10 demystified;
- Digital Forensics for Pentesters - Hands-on;
- Rest API Using MongoDB and NodeJS Beginners Guide;
- Pentesting and Securing Web Applications (Ethical Hacking);
- Pratical Ethical Hacking for Beginers;
- 2021 Beginner's guide to Cyber Security;
- The Complete Computer Basics Guide for Beginners 2021;
- Network Ethical Hacking for beginners (Kali - Hands-on);
- The Real Power of Penetration Testing Unveiled;
- Ubuntu Linux Server;

These are the courses that are a 100% completed on Udemy, I have allot more to finish and even more to start and keep learning new things.
